

**Standard Operating Procedure**

# **NGLD Acronyms**

Procedure Number: N/A

Department Owner: N/A

NGLD – Controlled Copy – Confidential – Internal Use Only

This document and the confidential information it contains shall be distributed or made available solely to authorized persons. This document shall not leave the company premises. This document should not leave the Owner's work area. Do not distribute outside of NGLD.

## TABLE OF CONTENTS

1	DEFINITIONS .....	1
---	-------------------	---

## 1 DEFINITIONS

Abbr.	Term	Description	Category	Pg.
<b>3PL</b>	3rd Party Logistics		Supply Chain	
<b>AAA</b>	Authentication- Authorization-Accounting	State characterized by the activities to control user access into the system after NGLD-M achieves power-up. The NGLD-M can power-up without the use of a CIK; which results in the NGLD-M ready for MA mode of operations.	State	
<b>ACES</b>	Automated Communication Engineering Software		-	
<b>AEHF</b>	Advanced Extremely High Frequency		-	
<b>AES</b>	Advanced Encryption Standard		-	
<b>AKDELIV</b>	Application Key Material Delivery		-	
<b>API</b>	Application Programming Interface		Software Component	
-	Architecture Review	A cross-functional gathering to review new or changed architecture.	Project Management	
<b>ARL</b>	Authority Revocation List		-	
<b>ATO</b>	Authority to Operate		-	
<b>AXID</b>	Association and Exchange Identifier		-	
<b>BCR</b>	Barcode Reader		Hardware	
<b>BF</b>	Benign Fill		-	
<b>BI</b>	Business Intelligence		Enterprise Software	
<b>BIT</b>	Built-in Test		-	
<b>BOL</b>	Bill of Lading		Supply Chain	

## Definitions continued from previous page

Abbr.	Term	Description	Category	Pg.
<b>BOM</b>	Bill of Materials		Supply Chain	
-	Bug	Any issue found on a GA product.	-	
<b>BVT</b>	Build Verification Test	A build is passed through a set of automated tests to ensure that the build is worthy of System Verification Test. The concept supporting BVT is a broad validation but of limited depth. Time is of the essence for BVT.	Software Component	
<b>CAC</b>	Common Access Card		-	
<b>CBRN</b>	Chemical, Biological, Radiological, and Nuclear		-	
<b>CCI</b>	Controlled Cryptographic Item		-	
<b>CCTS</b>	Customer Care & Technical Support	The department responsible for Customer Care & Technical Support.	Department	
<b>CDV</b>	Configuration, Demonstration, and Verification		-	
<b>CFDI</b>	Common Fill Device Interface		-	
<b>CFR</b>	Code of Federal Regulations		Legal	
<b>cGMP</b>	Current Good Manufacturing Practice		Manufacturing Standard	
<b>CIK</b>	Cryptographic Ignition Key		-	
<b>CMS</b>	Cryptographic Message Syntax		-	
<b>CNT</b>	Count		-	
-	Code Lock	Code Lock is the point at which Engineering enters a highly-controlled and monitored state of source code changes.	Software Component	
<b>COM</b>	Component Object Model	Technology created by Microsoft for creating software components.	Software Component	

## Definitions continued from previous page

Abbr.	Term	Description	Category	Pg.
<b>COMSEC</b>	Communications Security		-	
<b>CPD</b>	Capabillity Production Document		-	
<b>CPG</b>	Consumer Packaged Goods		Market	
<b>CPU</b>	Central Processing Unit		-	
<b>CPV</b>	Component Placement Verification		-	
<b>CREDRQ</b>	Credential Request		-	
<b>CRL</b>	Certificate Revocation List		-	
<b>CRM</b>	Customer Relationship Management		Enterprise Software	
<b>CRUD</b>	Create, Read, Update, and Delete		Software Component	
<b>CSfC</b>	Commerical Solutions for Classified		-	
<b>CSR</b>	Certificate Signing Request		-	
<b>CT3</b>	Common Tier 3		-	
<b>DC</b>	Distribution Center		Supply Chain	
<b>DCUT</b>	Development Complete and Unit Tested	All features coded and unit-tested. If a single feature failed to implemented, DCUT has failed.	Project Management	
<b>DDS</b>	Detailed Design Specification		Project Management	
-	Defect	Any issue found on a non-GA product.	-	
-	Design Document	A product design document (or specification) is a statement of how a design is made, what it is intended to do, and how far it complies with the requirements.	Project Management	
<b>DLL</b>	Dynamic Linked Library		Software Component	
<b>DMT</b>	Document Management Tool		-	

## Definitions continued from previous page

Abbr.	Term	Description	Category	Pg.
<b>DoA</b>	Delegation of Authority	A formal agreement that defines the financial and administrative responsibilities and authorities delegated to a person in charge of approving the decisions and transactions within the business entities.	Legal	
<b>DoD</b>	Department of Defence		-	
<b>DoDIN</b>	DoD Information Network		-	
<b>DoDIN-A</b>	DodIN-Alternate		-	
<b>DPMS</b>	Drug Pedigree Messaging Standard		Regulation	
<b>DRY</b>	Don't Repeat Yourself		-	
<b>DSCSA</b>	Drug Supply Chain Security Act (USA)		Regulation	
<b>DSS</b>	Digital Signature Standard		-	
<b>DTD</b>	Digital Transfer Device		-	
<b>EA</b>	Early Access	Sites and stakeholders' sign-up to get early copies of software for on-site validation. A process which offers clients the opportunity to preview new features and functionality before a GA release. Early Access begins in the implementation phase and concludes before the SDLC code-lock milestone.	-	
<b>EAN</b>	European Article Numbering		Standards	
<b>ECDH</b>	Elliptic Curve Diffie-Hellman		-	
<b>ECM</b>	Electronic Counter Measure		-	
<b>ECU</b>	End Cryptographic Unit		-	
<b>ECURS</b>	ECU Response		-	
<b>EDI</b>	Electronic Data Interchange		Software Component	
<b>EKMS</b>	Electronic Key Management System		-	

## Definitions continued from previous page

Abbr.	Term	Description	Category	Pg.
<b>EP</b>	Electronic Protection		-	
<b>EPC</b>	Electronic Product Code		Standards	
<b>EPCIS</b>	Electronic Product Code InformationService		Standards	
<b>-</b>	Epic	Represents a Feature request to the product	Software Component	
<b>EPRMLC</b>	Engineering Product Reference Manual Life Cycle	A process that governs the progression of creating new, and revising existing, Product Reference Manuals.	Project Management	
<b>ERP</b>	Enterprise Resource Planning		Enterprise Software	
<b>ES</b>	External Source	Is computer software that was not created internally. Open Source is a type of External Source software.	Software Component	
<b>ESN</b>	Electronic Serial Number		-	
<b>ESOH</b>	Environmental, Safftety, and Operational Health		-	
<b>ESP</b>	Encapulating Security Payload		-	
<b>ETL</b>	Extract, Transform, and Load		-	
<b>FAT</b>	Factory Acceptance Test		Project Management	
<b>FH</b>	Frequency Hopping		-	
<b>FM</b>	Frequency Modulation		-	
<b>FMCG</b>	Fast Moving Consumer Goods		Market	
<b>FMD</b>	Falsified Medicines Directive (EU)		Regulation	
<b>FOUO</b>	For Official Use Only		-	
<b>FPC</b>	Flexible Printed Circuit		Hardware	
<b>FS</b>	Functional Specification		Project Management	
<b>FS</b>	Fact Sheets		Project Management	
<b>FSDA</b>	Fail Safe Design Analysis		-	

## Definitions continued from previous page

Abbr.	Term	Description	Category	Pg.
<b>FTP</b>	File Transfer Protocol		Software Component	
<b>FTPS</b>	File Transport Secure Protocol		-	
-	Functional Specification / Product Design Document / High Level Design	A formal document produced by SD that outlines in detail, the operating parameters of the software module to be delivered.	Project Management	
-	Functional Testing	In-depth testing of the functionality of the module, to ensure that full-functionality has not been adversely affected by any updates or modifications.	Software Component	
<b>GA</b>	General Availability	Product is available for sale. (alt.) A release of software made generally available to the entire customer base.	-	
<b>GAMP</b>	Good Automated Manufacturing Practices		Manufacturing Standard	
<b>GBPS</b>	Giga bits per second		-	
<b>GCM</b>	Galios Counter Measure		-	
<b>GFS</b>	Government Furnished Software		-	
<b>GICv4</b>	Generic Interrupt Controller version 4		-	
<b>GPS</b>	Global Positioning System		-	
<b>HA</b>	High Assurance		-	
<b>HAIPE</b>	High Assurance Internet Protocol Encryptor		-	
<b>HBSS</b>	Host Based Security System		-	
<b>HDMA</b>	Health Distribution Management Association		Standards	
<b>HEMP</b>	High-Altitude Electromagnetic Pulse		-	

## Definitions continued from previous page

Abbr.	Term	Description	Category	Pg.
<b>HLD</b>	High Level Design	A document that provides a high-level overview of the new and/or enhanced functionality. This document details various topics such as: Impact Analysis, Use Cases, Testing strategy, and overview specifics. It serves as a communication mechanism for various stakeholders.	Project Management	
<b>HMI</b>	Human Machine Interface		Hardware Component	
<b>HP</b>	Hewlett Packard	A computer hardware and software company	-	
<b>HR</b>	Human Readable	Text that can be read by the human eye (as opposed to being encoded in a barcode)	Vision	
<b>HSM</b>	Hardware Support Module		-	
<b>HTTP</b>	HyperText Transfer Protocol		Software Component	
<b>IA</b>	Identity certificate		-	
<b>IAAS</b>	Infrastructure as a Service		-	
<b>iAPP</b>	Intermediary Application		-	
<b>IASRD</b>	Information Assurance Security Requirements Document		-	
<b>IAVA</b>	Information Assurance Vulnerability Alert		-	
<b>IDPDE</b>	iApp OTNK Device PDE Storefront		-	
<b>II</b>	Initial Instructions		Project Management	
<b>IOD</b>	Information on Demand		-	
<b>IoT</b>	Internet of Things		Software Component	
<b>IPC</b>	Industrial PC		Hardware Component	
<b>IPS</b>	Item Process Stream		-	

## Definitions continued from previous page

Abbr.	Term	Description	Category	Pg.
-	JIRA	Issue tracking and resolution system	Enterprise Software	
<b>KISS</b>	Keep It Simple Stupid		-	
<b>KYC</b>	Know Your Customer		-	
<b>LDAP</b>	Lightweight Directory Access Protocol		Software Component	
<b>LLD</b>	Low Level Design		Project Management	
<b>LLOC</b>	Logical Lines of Code		Software Component	
<b>LOC</b>	Lines of Code		Software Component	
<b>MAD</b>	Mark Agnostic Detector		Software Component	
<b>MAHI</b>	Mobile Agnostic Hardware Interface		Software Component	
<b>MDA</b>	Mechanical Damage Adaptation		Software Component	
<b>MDM</b>	Master Data Management		Software Component	
<b>MES</b>	Manufacturing Execution System		Factory Software	
<b>MI</b>	Markem-Image		-	
<b>MTH</b>	Math Tool		-	
<b>MV</b>	Machine Vision		Vision	
<b>NIRF</b>	New Item Request Form	Used to request a new item add to the financial accounting system (Macola).	-	
<b>NIST</b>	National Institute of Standards and Technology		Standards	
<b>OCR</b>	Optical Character Recognition		Vision	
<b>OCV</b>	Optical Character Verification		Vision	
<b>OCV2wR</b>	Optical Character Verification with Rotation		Vision	

## Definitions continued from previous page

Abbr.	Term	Description	Category	Pg.
<b>OEM</b>	Original Equipment Manufacturer		Hardware	
<b>OM</b>	Operations Manual		Project Management	
<b>OPC</b>	Open Platform Communications		Standards	
-	Operating System		Software Component	
<b>OS</b>	Open Source	Is computer software with its source code made available with a license in which the copyright holder provides the rights to study, change, and distribute the software to anyone and for any purpose. Open Source software may be developed in a collaborative public manner.	Software Component	
<b>PAAS</b>	Platform as a Service		-	
-	Patch	Limited distribution software update intended for a specific customer to meet immediate needs between normally scheduled software releases. Patches typically contain bugs only. Based on project requirements feature changes or enhancements may be added.	Software Component	
<b>PCA</b>	Principal Component Analysis		-	
<b>PD</b>	Personal Data		-	
<b>PDD</b>	Product Design Documentation	A document that details various topics such as: Impact Analysis, Use Cases, Testing strategy, and overview specifics. The PDD serves as a communication mechanism for various stakeholders.	Project Management	
-	Performance Testing	Ensure the Module conforms to performance criteria defined in Functional Specification / Design Documentation	Software Component	
<b>PK</b>	Primary Key		-	

## Definitions continued from previous page

Abbr.	Term	Description	Category	Pg.
<b>PLC</b>	Programmable Logic Controller		Hardware Component	
<b>PoE</b>	Power over Ethernet		Hardware	
<b>PPC</b>	Panel PC		-	
-	Product Owner	Member of Product Line Management responsible for providing requirements and guidance to on Product releases.	-	
<b>PWO</b>	Process/Packaging Work Order		Supply Chain	
<b>QA</b>	Quality Assurance	The department responsible for software testing. (alt.) Maintenance of a desired level of quality in a service or product, particularly by means of attention to each stage of the process of delivery or production.	Department	
-	QA Test Plan	A formal test procedure that is written from the Functional Specification, Product Design Document, or High Level Design that details the steps taken to test a software module.	Project Management	
<b>QBR</b>	Quarterly Business Review		-	
<b>QR CODE</b>	Quick Response code	A QR code is a type of matrix barcode invented in 1994 by the Japanese automotive company Denso Wave.	-	
<b>RC</b>	Release Candidate	A software release candidate, which has gone through formal QA testing and has been approved by QA for general availability to the public.	Software Component	
<b>RDD</b>	Requirements Design Document	A document defining the requirements of a proposed product's solution.	Project Management	
-	Regression Testing	Allows the verification of functions of each build. Verifies that modifications have not introduced new problems.	Software Component	

## Definitions continued from previous page

Abbr.	Term	Description	Category	Pg.
-	Repository	Designated network drive/directory used to house automated test scripts and test data.	-	
<b>RFID</b>	Radio Frequency Identification		Hardware	
<b>RN</b>	Release Notes		-	
<b>ROI</b>	Region of Interest	Area of the captured image within which the vision tool performs its analysis.	Vision	
<b>SA</b>	Standards & Architecture	The department responsible for developing product solution standards.	Department	
<b>SAAS</b>	Software as a Service		-	
<b>SAT</b>	Site Acceptance Test		Project Management	
<b>SCADA</b>	Supervisory Control and Data Acquisition		Hardware	
<b>SCM</b>	Software Configuration Management		-	
-	Scrum Master	Individual performing the role of Scrum Master for a product/project team.	-	
<b>SD</b>	Software Development	Department within Engineering	Department	
<b>SLOC</b>	Source Lines of Code		-	
<b>SOP</b>	Standard Operating Procedures		-	
<b>SP</b>	Stored Procedure		-	
-	Spike	Represent a block of time, up to 54 hours to perform research for a story/feature. Spikes must have subtasks generated to capture the work being completed.	Software Component	
<b>SQA</b>	Software Quality Assurance	A set of activities for ensuring quality in software quality processes	-	
<b>SQL</b>	Structured Query Language		Software Component	

## Definitions continued from previous page

Abbr.	Term	Description	Category	Pg.
<b>SSCC</b>	Serial Shipping Container Code		Standards	
-	Story	Represent how a feature will be implemented. A story is confined to work that can be completed within a sprint (54-hour work period) and must be broken into subtasks.	Software Component	
-	Sub-Task	Represents a breakdown of the work needed to complete a story, task, bug, defect, or Spike e.g. Dev-Task, QA, Product Doc.	Software Component	
-	Supply Chain Management		Enterprise Software	
<b>SVM</b>	Support Vector Machine		-	
-	Technical Lead	Member of Engineering who is considered the subject matter expert of a specific area.	-	
-	Technical Story	Represent any work undertaken as part of an Engineering Initiative with the goal of improving a process within engineering.	Software Component	
-	Test Case	Individual test step found within a manual or automated QA test procedure	Software Component	
-	Test Cycle	The tasks that are performed during the process of testing the software.	Software Component	
-	Test Scripts	Scripting (code) that is generated from UFT and by testers. The scripts are based upon the Requirements / Design Elements identified in the Test Plan.	Software Component	
-	Test Sequence	Series of sequences (steps) comprising on test scenario.	Software Component	
-	Test Steps	The steps required to perform additional manual testing which cannot be easily automated.	Software Component	
<b>TG</b>	Technical Guide		Project Management	

## Definitions continued from previous page

Abbr.	Term	Description	Category	Pg.
<b>TP</b>	Test Plan	The documented plan of what and how modules / software will be tested.	Project Management	
<b>TPC</b>	Thin-Client PC		-	
<b>UCC</b>	Uniform Code Council		Standards	
<b>UDF</b>	User Defined Function		Software Component	
<b>UFT</b>	Unified Functional Testing	An automated testing tool from HP	-	
<b>UI</b>	User Interface		Software Component	
<b>UPC</b>	Universal Product Code		Standards	
<b>UPS</b>	Uninterruptable Power Supply		Hardware	
<b>URS</b>	User Requirements Specifications		Project Management	
<b>VAR</b>	Value Added Reseller	A company that adds features or services to an existing product, then resells it (usually to end-users) as an integrated product or complete turn-key solution.	-	
<b>VQ</b>	Validation Qualification		Project Management	
<b>VOID</b>	Virtual Unique Identifier		-	
<b>WMS</b>	Warehouse Management System		Enterprise Software	
<b>XML</b>	Extensible Markup Language		Software Component	
<b>XP</b>	Extreme Programming		Software Component	
<b>YAGNI</b>	You Ain't Gonna Need It		-
